

EcoEXEMPT[®] HC

Herbicide Concentrate: Non-selective

ACTIVE INGREDIENTS:

2-Phenethyl Propionate	21.4%
Eugenol (Clove Oil)	21.4%
Total: 100.0%	

OTHER INGREDIENTS: Water and Lecithin

• USDA National Organic Program Compliant

- Fast Acting - Kills weeds, grasses and unwanted vegetation on contact
- Food-grade active ingredient from botanical oils
- Safe for use around sensitive accounts
- Minimum-risk herbicide

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID

IF IN EYES: Flush with plenty of water. Seek medical attention if irritation persists.

IF ON SKIN: Wash with soap and water.

IF INHALED: Remove exposed person(s) to fresh air.

IF SWALLOWED: Rinse mouth out with water. Do not induce vomiting. Seek medical attention if feeling sick or nauseous.

PRECAUTIONARY STATEMENTS

May cause eye irritation. Avoid contact with eyes.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Persons handling concentrate are recommended to wear:

- Protective eyewear
- Chemical resistant gloves made of neoprene, nitrile or natural rubber.

User Safety Recommendation

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove clothing immediately if the product gets inside. Wash thoroughly and put on clean clothing. Remove PPE after handling this product. Wash the outside of the gloves before removing.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill or store near heat or open flames. Store only in original container.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR BEST RESULTS:

- Coverage is vital. The more foliar coverage from applications, the better the product will perform.
- Best applied with air temperatures above 50° F.
- Use an approved wetting or spreading agent to improve coverage.

SHAKE WELL BEFORE USING. Maintain agitation in all spray systems. Holding a water dilution for more than 24 hours is not recommended. **DO NOT FREEZE.**

OVERVIEW

This product is a contact, non-selective, broad spectrum, foliar-applied herbicide. This product will only control actively growing green vegetation. It provides burn down of both annual and perennial broadleaf and grass weeds. The degree of burn down and the longevity of control is less when the plants are inactive, mature or biennial/perennial types. This product is not translocated. It will burn only those plant parts that are coated with spray solution.

This product can be applied through most standard or field type sprayers after dilution and mixing with water in accordance with label instructions. For best results, spray coverage should be uniform and complete.

Visible effects on most weeds occur within hours. This product does not damage mature, non-green, woody parts of plants. Cool weather following treatment may slow the activity of this product and delay or reduce visual effects.

This product provides no residual weed control. Repeat treatments will be necessary for new plants emerging from seed or regrowth of treated vegetation.

Timing

For most rapid kill, apply in warm sunny weather. Avoid applications when rainfall is imminent. A rain-free period of 3 to 4 hours following application is usually sufficient for effective kill. Avoid cold temperatures. Applications when temperatures are below 65° F slows the rate of kill and reduces the visual effect of the herbicide even though weeds may still die.

Mixing and Application Instructions

AS WITH MOST PRODUCTS, FOR OPTIMAL RESULTS USE AN APPROVED WETTING OR SPREADING AGENT TO IMPROVE COVERAGE.

Apply spray solutions in properly maintained and calibrated equipment capable of delivering desired volumes. Applications should be properly directed to avoid spraying or allowing drift to desirable plants. Always clean tank, pump, and line thoroughly with water after use.

For best results with backpack or other small tank applications ensure thorough mixing of herbicidal solution at filling and during the spray operation. Sprayers without continuous agitation should be shaken or mixed regularly to maintain emulsion.

Hand-Held and High Volume Equipment:

Spray-to-wet applications of this product may be made with boom, knapsack and backpack sprayers, pump-up pressure sprayers, handguns, hand wands, and other hand-held spray equipment and vehicle mounted high volume spray equipment. Apply spray solutions of this product to foliage of vegetation to be controlled. For most efficient use of spray mixture, spray all leaf surfaces uniformly and completely to wetness.

RECOMMENDED RATES

(Mix 20-25 ounces EcoExempt HC per gallon of water). Agitate well to ensure emulsion. Apply with enough water to ensure contact and coverage of all weeds. Thoroughly cover weeds. Repeat process as necessary.

STORAGE AND DISPOSAL

Do not contaminate water, feed, or foodstuffs by storage or disposal.

Storage: Keep container tightly closed when not in use. Store only in the original container in a cool dry place inaccessible to children and pets. In case of spill or leakage, soak up with an absorbent material such as sand, sawdust, earth, fuller's earth, etc. Dispose of with trash.

Container Disposal: Triple rinse or its equivalent, then offer for recycling or reconditioning, or puncture and dispose of with ordinary trash.
